

Read with your ears.

Eye-Pal enhances your ability to understand and comprehend printed material.

Eye-Pal is your lightweight, on the go instant reader!

“As a low vision optometrist for over 17 years, I have evaluated hundreds of innovative tools to help the blind and visually impaired and I cannot think of an innovation that is more efficient as the Eye-Pal. I started using it myself to remain productive with the onset of my own loss of vision.”

Dr. Bill Takeshita,
Chief of Optometry,
Center for the Partially Sighted
Santa Monica, CA

Oral learning is the original way to communicate. Eye-Pal converts printed pages to speech in real time, so in effect you can read with your ears.

Lightning fast and weighing in at just 16 oz, Eye-Pal is an extremely portable USB device with a simple diminutive design that belies its powerful capabilities. With a single keystroke, the Eye-Pal instantly converts to speech, text files or refreshable Braille.

Eye-Pal's intelligent design & engineering make it so much easier to use.

We designed simplicity and ease of use into all facets of the Eye-Pal. Its two aluminum legs pivot into a L-shaped stand from their compact carrying position. The L-shape configuration securely supports the camera to assure that it is always at the exact distance to obtain a crystal clear image and serves as a tactile guide for blind users to precisely position the material to be scanned. No camera focus adjustments are ever necessary.

ABiSee
So much easier.

Eye-Pal

Minimum System Requirements

- An IBM compatible personal computer
- 1.4 GHz Pentium or equivalent AMD processor
- 1 GB RAM memory
- 1 GB free space on hard drive
- High Speed USB 2.1 port
- Microsoft Windows® XP, Windows® 7

The Eye-Pal works fast to push your productivity up.

At home, at the office, even in the dark, Eye-Pal allows you to browse through piles of letters and organize them either as paper or computer files. Eye-Pal can assist with reading bound books, newspapers, or professional magazines and can even save the printed material as text or sound with one click.

Eye-Pal's patented motion detector can scan up to 20 pages per minute from a bound book. Just turn a page in your book and wait for the shutter sound. After you hear the shutter sound turn the page again. It's that easy. With a single keystroke you can easily start and stop reading or even have the page layout described to you.

Features

Easy: Place your printed material under the Eye-Pal camera and press a key on your keyboard. Within a few seconds your document is read aloud

Lightweight and Portable: Weighs just one lb and folds like a tripod to travel in your laptop bag

Easy Scanner: Allows you to keep books bound and intact

Fast: Scans up to 20 pages per minute

Accommodating: Place your document upside down, in landscape position, etc. Orientation of the page does not matter

Versatile: Convert any printed text into multiple accessible formats including speech, sound or text files

Efficient: Provides fast forward and rewind capabilities

Multi-Lingual: Ability to read in 9 foreign languages
